In order to receive government funding, CHD is required by state and county policies to charge for services it provides to the public. However, no one will be denied clinical services because of an inability to pay. Discounts are available based on family size and income. For more information, please see the front desk. CHD does not discriminate on the basis of race, ethnicity, gender, gender identity, gender presentation, sexual orientation, religion, creed, age (except when program eligibility is restricted to children, adults, or older adults), familial status, marital status, source of income, and disability. Language services, interpreters, or other assistive aids are available at no cost. For further information about this policy, contact Human Resources, 541-962-8811, or TTY 1-800-735-2900 or dial 711.

Up to 90% of those detoxified from opioid use will relapse within the first 1-2 months unless treated with medications.

Program Scheduling
Clients enrolled in the MAT Program will participate in a combination of services as a part of treatment. MAT services are provided Monday through Friday between 8:00 am and 5:30 pm.

How to Enroll

About this Program

Center for Human Development, Inc. offers hope and healing to individuals and families suffering from opioid use disorder. Our team of certified drug and alcohol counselors, licensed medical providers, and certified recovery mentors have the training and experience required to help individuals understand and overcome opioid use. The MAT Program helps treat opioid addiction through medication, counseling, and through the support of family and friends.

Would You Like Help with Your Opioid Use?

Medication: Medications help lessen the cravings. This can make cutting down or stopping the use of opioids easier. Medications also help the brain to heal from addiction. Medications used to treat opioid use disorder at CHD are buprenorphine (Subutex) and buprenorphine/naloxone (Suboxone).

Counseling: Talking with a therapist helps a person to learn about new ways of dealing with problems, stress, depression, anxiety, and/or trauma. Through learning new skills and talking about feelings, counseling helps assist individuals improve their quality of life while making the transition to recovery possible.

Support from Family and Friends: Supportive family and friends can help loved ones stop using opioids. Groups can also help. CHD treatment groups and 12 step recovery programs like Narcotics Anonymous (NA) bring together people who want to stop using.

Evidence Shows

- Decreased opioid-related deaths
- Less illicit drug use
- Reduced risk of relapse
- Improved social functioning
- Increased treatment retention
