COVID-19 Public Health Update

Union County, Oregon — Center for Human Development (CHD) public health is reporting 26 new cases, bringing the total case count for Union County to 717. We continue to see some cases that are linked to each other, but many are sporadic meaning that those who test positive are not sure how or where they became infected. Union County residents can play a role in slowing down the spread of COVID-19 by following preventive practices that limit spread – wearing face coverings, keeping physically distant from people outside of their household, limiting social gatherings, and staying home when they are ill or have come into contact with someone that has tested positive for COVID-19. Taking risk reduction measures today can slow the spread of COVID-19 to keep more vulnerable community members safe and maintain hospital capacity.

Additional information on COVID-19 can be found on the Oregon Health Authority (OHA) website. The OHA continues to monitor trends in case counts, hospital and healthcare capacity, and zip code and age distribution of cases. The OHA provides a variety of reports on their main webpage daily and weekly addressing this information. To access additional data on Union County COVID-19 cases, visit the [Oregon Health Authority's COVID-19 Data Dashboard](#) website.

Fall and Winter Gatherings

The colder weather and holidays increase the amount of time people congregate indoors. Indoor activities do increase the risk of COVID-19 spreading. For more information on how to celebrate Fall and Winter holidays safely, visit the [CDC COVID-19 Holiday Celebrations](#) webpage.

The Center for Human Development is currently testing individuals identified through investigations or individuals that meet Oregon State Public Health Lab criteria. We are not testing individuals for travel needs. Testing is still being offered throughout the community. If you are interested in being tested we encourage you to contact your primary care provider.

It is vital that workplaces support employees who are required to quarantine and not ask them to go to work in these situations. We ask that local employers to make it easy for people to make the choice to stay home by promoting working from home when possible, applying paid sick leave policies liberally, and linking employees to any workplace resources available. We also realize that for many employers and employees that this is a difficult situation.

Multiple resources are available to help you stay at home through wraparound services including financial assistance, food bank information, grocery pickup/delivery, health insurance, and Veterans services. Information on Union County resources is available at <https://www.neonoregon.org/unioncovid19> by calling 541-962-1610 or by emailing covidwrapsvcs@union-county.org

Masks, face coverings or face shields are currently required statewide:

People with mild signs of COVID-19 should stay home, unless the signs of illness are serious enough they would normally seek health care. Call your health care provider before going in. Make a plan for how to be seen, while also avoiding spread of the illness to others.

Individuals who feel very ill should seek appropriate care. If it is an emergency, call 911. For information on when to seek emergency medical attention visit <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>. If it is not an emergency but you feel sick enough to need a medical appointment, call your primary care provider. If you don't have a doctor, call 211 for a list of providers near you.

If you need further general information about COVID-19, please visit our webpage www.chdinc.org/covid19 or call 211.
